HELPMEET

An assistant for turn

Helpmeet

- Helpmeet is a tool for flipping, and repositioning of bedridden people.
- Most of the time It requires more than one person to reposition the bedridden persons. This may cause even physical difficulties for care givers.
- Helpmeet is a motorized roller attached to common side rail.
- Helpmeet is appropriate for use in hospitals, nursing homes, and homes of bedridden patients.
- We have provision to add this facility to existing cots.
- Helpmeet is a optimal solution
